

Vasile Silviu Sărmășanu – Database Expert

Mr **Sărmășanu Vasile Silviu** has been a PHP developer since 2005. His work experience has had a focus on developing personalized web solutions to meet the customers' requirements. As a PHP developer, he had to do his own research to collect, classify and analyze the data and develop the most suitable and efficient strategies to reach the targets and meet the deadlines. He has worked as part of different programming and design teams to implement and optimize the data base structure and the internal flow concept of web applications.
